

PEUGEOT 504

504 STANDARD PICK-UP

The 504 Pick-up is the real Pick-up, with the ability to handle a hard day's work. Economical and robust, it combines the versatility of a workmanlike load carrier and the comforts of a saloon car.

504 Standard Pick-up copes with payloads up to 1265 kg (1.244 tons) including the driver and any passengers or equipment carried and offers a choice of two powerful engines. The 1796 cm³ petrol engine with transistorised breakerless ignition develops 59 kW (80 PS) at 5500r/min. and will run on either leaded or unleaded fuel without adjustment. The well proven 2304 cm³ diesel developing 51.5 kW (70 PS) comes with rapid pre-heat plugs for reliable cold start performance. Standard models have a 4-speed gearbox with ratios carefully selected to combine load carrying ability with economy of operation and a limited slip rear differential helps to keep you and your Pick-up moving under slippery conditions.

The generous load area is 2 metres (6 ft. 7 ins.) long by 1.5 metres (4 ft. 11 ins.) wide, with a class leading width between the wheelarches of 1.11 metres (3 ft. 7.8 ins.). Sturdy quick release catches retain the double skinned tailgate, which can be retained at 90 degrees, where it provides an extension to the loadbed, or lowered completely to 180 degrees where necessary. A ladder rack/cab protection frame with hinged ladder retainers is standard equipment.

Inside the 504 Standard Pick-up the adjustable bench seat is trimmed in easy-to-clean vinyl. The fascia incorporates a clock in the comprehensive instrument cluster and the heating and ventilation system features a variable speed blower. Ample storage space is provided by door pockets and a lockable glove box.

504 GL PICK-UP

504 GL Pick-up offers the same capacity for hard work as the Standard model, but with a higher specification to make the working day more comfortable and efficient.

With a payload capability of 1260 kg (1.240 tons) including driver and any passengers and equipment carried, the GL has the same choice of 1.8L petrol or 2.3L diesel engines as the Standard model but with the additional benefit of a 5-speed gearbox for more relaxed cruising and improved fuel economy.

As with the Standard model, the GL has the advantage of a limited slip differential.

Inside the GL cab, additional features include cloth seat trim with matching padded head restraints, radio/cassette player and cab floor carpet.

Both Standard and GL Pick-ups have a durable paint finish in a choice of attractive colours, with metallic paint finish available as an extra cost option on GL models; comprehensive anti-corrosion treatment is applied to all 504 Pick-ups.

Also available are a range of useful accessories including a stylish front nudge bar, a loadliner to protect the load area and an attractive G.R.P. hardtop which provides extra security for your load.

Carefully designed coil spring independent front suspension and live, leaf spring rear suspension ensure the 504 Pick-up carries its payload without difficulty, while servo-assisted dual-circuit braking with front discs and rear drums provide plenty of stopping power.

The 504 Pick-up in either Standard or GL form is a robust proven performer, combining no-nonsense working ability with practical cab comfort and impressive value for money.

All 504 Pick-ups receive a 12-month unlimited mileage warranty with additional 2nd and 3rd year warranties at extra cost.
