PEUGEOT

## **104 Hatchback**

Peugeot 104 Hatchbacks – personality with a range of choice!

For a start, there's the choice of two distinctive body-shapes – with three or five doors. There's also a choice of flexible, responsive engines from 954cc to 1360cc. Then there's the choice of practical, luxury or sports style trims.

All the 104 range are aerodynamically styled so that as well as being good looking they are extremely fuel efficient. And you can opt for even more economy with the models that run on two star petrol.

**peugeot504.info**

## **104 Hatchback**

The 104 three-door hatchbacks — three models that are short on length but long on style, power and economy. Their neat overall design makes them compact outside, roomy inside. Ideally suited for town life where their excellent manoeuvrability makes parking so easy, they are equally at home motoring on the open road.

Practical? Definitely. There's a rear parcel shelf to hide your possessions from prying eyes. And there's a low load floor and wide opening tailgate that lifts gas-filled struts. Fold down the rear seat for extra load carrying capacity.

peugeot504.info

## 104 Hatchback

The 104 five door hatchbacks – designed to meet your every need for economy, luxury and performance.

Large glass areas provide excellent all round visibility and enhance the spaciousness of the colour-keyed interior. Generous leg and headroom means that even when carrying five adults there's comfort for everyone. And the long list of standard equipment means you travel in style.

Even your rear seat passengers will enjoy the journeys with large wind down windows and door armrests. And Peugeot take care of your family with childproof locks on the rear doors, inertia reel seatbelts and dual braking circuits.

## peugeot 104 info

All the 104s share a modern four cylinder aluminium alloy engine mounted transversely. With an overhead camshaft for improved performance and five-bearing crankshaft and removable wet cylinder liners for extra strength and ease of maintenance.

Because the engine is strong yet light, the fuel economy is excellent. Moreover, less weight on the driving wheels results in light, positive steering even at low speeds – parking is always a simple task. Sophisticated independent suspension all round lets passengers ride in comfort and helps prevent them being jolted by rough road surfaces.

Peugeot 104 – three or five doors. Engineered for reliability, it has to be the hatchback choice for today!

### 305 Saloon

Peugeot 305 Saloons are recognised for their good looks – inside and out. And they share the Peugeot pedigree for qualities like ruggedness, reliability, exceptional passenger comfort and real value for money.

Outside, their good looks are the result of wind tunnel tested styling so that the 305 has a lower drag coefficient than other cars in its class. That means greater fuel economy and lower fuel bills.

peugeot504.info

### **305 Saloon**

Inside, ergonomic studies helped develop a dashboard and controls where everything is clearly visible and within easy reach. Sculptured door handles and a colour-keyed interior add a quality look as well as a quality feel.

There's a range of eight models. The choice is enormous – economy, luxury or sports style trims. Plus the choice of 1290cc and 1472cc petrol engines or the additional economy of 1548cc diesel motoring.

### 305 Estate

The new 305 Estate range has four stylish estates to choose from.

Furthering the Peugeot reputation for in-built strength, reliability and safety, come the new 305 Estates – purpose made estates. Their specially developed suspension system and extra long wheelbase put them well ahead of their rivals for a better ride and extra space.

peugeot 504

### 305 Estate

Front wheel drive plus a rear suspension that operates horizontally under the floor – not vertically into the boot area – gives a really wide, flat load deck. The twin rear seats are split so that one can be folded down, or both can be folded down for extra loading capacity.

There's a choice of powerful engines – 1300cc and 1500cc petrol and 1550cc diesel – as well as a choice of trim and equipment levels.

## 504 Saloon

When a 504 driver wants a change he chooses another Peugeot 504. The reason? Well, there is no doubt that the economy and reliability for which Peugeot are world renowned will figure high on his list of priorities.

Superbly engineered, the 504 Saloon is value for money at a realistic price. Its 1800cc engine is powerful but frugal – the two star fuel bills won't throw you into a state of shock. Nor will the servicing bills. Main service intervals are only once a year or every 10,000 miles with an oil change and safety check at 5,000 miles. So your 504 spends more time with you on the road than in the service bay.

### **504 Saloon**

And that reliability is important whether you are a businessman or family driver. Of course, for extra economy and high mileage reliability, you can opt for the 2112cc diesel powered 504.

Proven in many countries and across a wide variety of terrains – including successes in some of the world's most gruelling rallies, the 504 is smooth, secure and quiet. Its comprehensive equipment level means even long journeys are less tiring.

Stylish, rugged, economical – the 504 saloon offers so much more for so much less.

peugeot504.info

## 504 Estate

All the Peugeot 504 Estates are built as estates with a specially lengthened wheelbase and wide flat load deck. Plenty of low speed torque and power in reserve mean that the 504 Estates can also cope with those really heavy loads, a trailer or take you and your caravan on holiday.

Peugeot 504 Estates. Styled for special occasions as well as special loads.

**peugeot504.info**

## **504 Estate**

Group transport problems or just a large family? The 504 Family Estate has the answer with three rows of forward facing seats that will seat eight comfortably. And there's still space for luggage!

Fewer people but a larger load? Fold down the rear row of seats for extra load carrying capacity. That is 504 Family Estate versatility.

Peugeot 504 Family Estate available with 1971cc petrol or 2304cc diesel engine.

**peugeot504.info**

### **505 Saloon**

Not just one car but a range of superbly appointed executive style saloons with a choice of engine sizes and trim levels—the Peugeot 505.

Winner of many major motoring press accolades since its launch, the 505's modern design, comfort and style deserve the praise. The Peugeot 505 saloon is available with 1971cc carburettor, 1995cc fuel injected or 2304cc diesel engines that are strong, reliable and ensure years of trouble free motoring.

**peugeot504.info**

### 505 Saloon

A smooth ride and tenacious roadholding are assured thanks to independent all round suspension with front and rear anti-roll bars. The driver is well looked after with excellent all round visibility, power steering, and well-designed instruments and controls.

Safety has been a prime consideration in this model's design. Numerous active and passive safety features have been incorporated for maximum protection.

**peugeot504.info**

## **604 Saloon**

Designed and built to provide performance with luxury, the style of the 604 is undeniable, but the beauty of this car is much more than skin deep. With three 604 models, you have the choice between fuel injection, twin carburettor or turbo-charged diesel power.

On both the petrol variants the 604 is fitted with a 2664cc V6 engine with aluminium alloy cylinder block heads and hemispherical chambers. Likewise they both have electronic ignition. Automatic transmission is available as an option.

Choose a 604 diesel and you have the power of a 2304cc turbo-charged diesel engine which combines the fuel economy of a small car with the luxury and performance of a limousine.

## peugeot 604.info

All 604s offer a comprehensive specification including electrically operated front and rear windows, tinted glass, a centralised locking system operating on doors, windows and sunroof.

Power assisted steering is light and precise. And the all independent suspension system with long travel springs and double-action shock absorbers cushions the passengers compartment while each wheel hugs the road.

The Peugeot 604 – built to exacting specifications utilising the most modern engineering features for maximum safety of driver and passengers.

Peugeot 604 – the epitome of Peugeot quality, safety and reliability.

## 305 Van

The new Peugeot 305 van brings new standards of comfort, quality and reliability to commercial vehicles.

Front wheel drive means a low load floor for ease of loading. And with the 305 van you get a really big load space – 56.5 cu ft plus a rugged suspension especially designed to minimise intrusion into the load area.

The 305 van is more than just a practical hard worker.

Comfortable seats, modern dashboard design and a superb heating and ventilation system make it a pleasure to drive.

You can opt for the 1290cc petrol powered model or the 1548cc diesel model to suit your style of work.

Choose a 305 van because in a tough business world it pays to choose the best.

## peugeot504.info

The stylish lines of the 504 pick-up may deceive you, but it is a large capacity, hard-working vehicle ready to adapt to all kinds of commercial tasks.

Whether performance or economy is your priority you have the choice of two power units – 1618cc petrol or 1948cc diesel. Both engines have been developed to give you solid power and smooth low speed torque. And with the 504 suspension, the ride is superb whether laden or unladen.

Inside, the comfort level is as high as you'd expect from a saloon but has been adapted to meet the rigorous functions of commercial life.

# Peugeot Reliability

The basis for reliability is laid by thorough research, planning and skill in design. Only the best quality materials and components are used, many of which have been designed specifically for Peugeot and are manufactured in Peugeot factories.

Continual pre- and post-production testing evaluates parts and prototype models for quality of manufacture, for design efficiency and as part of one of the most comprehensive programmes in the industry.

Anti-corrosion treatment is equally thorough. New cathodic electrophoretic processes give an even greater level of protection, which is reinforced by bitumen wax injection treatments to doors and hollow sections, a PVC anti-chipping compound applied to wheel arches and along the sills, and the whole underbody covered in a thicker bitumen wax coating.

All this extra care means quality and reliability built into each and every Peugeot product.
