Peugeot Automobiles U.K. Ltd., 333 Western Avenue,
London W3 0RS

PEUGEOT vehicles are designed and manufactured with safety, comfort and reliability as prime considerations. The level of standard equipment is high, but many owners may wish to further improve their cars by the fitting of PEUGEOT approved accessories. This booklet has been produced to show a representative selection of the wide range available. These have been specially selected, after careful testing for their suitability and quality, with the majority having been tailored specifically for our range of cars.

Prices and full application details are shown in the separate price list or may be obtained from your PEUGEOT Dealer, who will also be pleased to inform you of any new additions.
